Politiques et mesures d'efficacité énergétique dans le secteur industriel en France

Aperçu de la base de données

Quelques chiffres:

- 1810 politiques d'EE en cours dans la base européenne en juillet 2024
- 974 complétées ou prévues
- Moyenne à 45 politiques par pays
- Pays les plus représentés: Allemagne (137), France (136)
- Les mesures qui ciblent l'industrie représente 12% du total, avec 216 politiques sur 1810.

Répartition des mesures françaises par secteur

Paramètres de tri de la base de données MURE

- **Country**
- **Sector:** Cross-cutting (horizontal measures), Households, Services, Industry, Transports
- **Type:** Mandatory information, mandatory standards, financial, fiscal, information/training, market-based instruments, others, general programme
- **Period of implementation**
- **Status:** Ongoing, Completed, Proposed
- **Targeted end-uses:** Process heat and electricity generation, lighting, process cooling, space heating, VAC, electric motors and drives, electric processes, ICT
- **Targeted Audiences:** Building professionals, Employees, Employers, Energy managers, Energy suppliers, Large enterprises, Professional associations, Trade associations, Researchers, SMEs, Space Heating, Students, Total final consumption
- **Actors:** Central Government, Energy Agencies, Energy Suppliers, Local Authorities, Manufacturers, Professional Associations, Trade associations
- **(sub-)sector:** Chemicals, Construction, Engineering and metal industries, Food, Iron and steel, Mining, Non-ferrous metal, Non-metallic minerals, Paper and board, Textile, Timber and wood products
- **Energy poverty**
- **Energy Sufficiency**
- **Semi-quantitative impact:** High, medium, low
- **Relation to EU policy framework:** NECP, Art 7/8 EED measures, using EU funding
