Poszanowania Energii S.A.

Czym jest baza MURE?

MURE (Mesures d'Utilisation Rationnelle de l'Energie)

ODYSSEE-MURE

Baza danych MURE dostarcza narzędzi do oceny wpływu różnych **instrumentów politycznych** na oszczędności energii i redukcję emisji CO₂. Gromadzi dane dotyczące realizowanych, planowanych lub zakończonych działań w obszarze efektywności energetycznej.

MURE umożliwia analizy dotyczące sprzężenia między instrumentami polityki a efektywnością energetyczną. Użytkownicy mogą korzystać z informacji do oceny skuteczności wdrażanych działań

Welcome to the MURE database on energy efficiency measures in the European Union (plus Norway, Switzerland, UK and Energy Community Contracting Parties^{*}).

The database includes policies and measures in the countries covered as well as for the European Union as a whole, which aim at the improvement of energy efficiency in the end-use sectors for households, industry, transport and services.

The left menu provides several options for searching the database. Policies are organised by sector, country and measure type. Click on "More options" to access further search parameters to refine your query. The results are shown on the right. Once selected, click on the measure title to get more detailed information on the measure or on the "more details" button to get more information about the measure.

If you have any comments or questions about the database, feel free to contact us:

^{*} Albania, Bosnia-Herzegovina, Montenegro, North Macedonia, Kosovo, Serbia, Georgia, Moldova and Ukraine.

The screenshot displays the MURE Database interface. On the left, there are search filters for Sector (Household), Countries (Poland), Measure type, and Targeted end-use. The main area shows 13 measures found, with a table listing details such as Country, Sector, Title, EU status, Type, and Starting Year. A 'more detail' toggle is visible above the table, and an 'Export' button is in the top right corner.

Country	Sector	Title	EU	Type	Starting Year
Poland	Household	Requirements for new and modernised buildings	No	Mandatory standards	2014
Poland	Household	EU-related: Energy Performance of Buildings (Directive 2002/91/EC) - Certificates of energy performance for buildings	Yes	General programme	2009
Poland	Household	Subsidies for energy-efficient houses	No	Financial	2013
Poland	Household	"Clean Air" Programme	No	Financial	2018
Poland	Household	"My Electricity" Programme	No	Financial	2019
Poland	Household	Thermo-modernization tax relief	No	Fiscal	2019
Poland	Household	Energy Efficient Construction	No	Financial	2016
Poland	Household	STOP SMOG Programme	No	Financial	2019
Poland	Household	Warm Housing	No	General programme	2022
Poland	Household	My Heat	No	Financial	2022
Poland	Household	Improving air quality by replacing heat sources in multifamily buildings - pilotage	No	Financial	2021
Poland	Household	Improving air quality in the most polluted municipalities - pilot	No	Financial	2021
Poland	Household	Improving air quality by replacing heat sources in multi-family buildings - a pilot in the Lower Silesian Province	No	Financial	2021

Instrumenty poprawy efektywności energetycznej w bazie MURE

The screenshot displays the MURE Database interface. On the left, there are search filters for Sector (Household), Countries (Poland), and Measure type. A blue arrow points from the Measure type dropdown to a 'Measure type' modal window. The modal window lists various measure types with checkboxes: Mandatory information, Mandatory standards, Financial, Fiscal, Information/training, Market-based Instruments, Others, and General programme. The main table shows 13 measures found, with columns for Country, Sector, Title, EU, Type, and Starting Year. The table is partially obscured by the modal window.
